Install and Configure ECM & Approval Hub Mobile Applications

(iOS Devices)

This guide provides technical users with comprehensive instructions for installing and configuring the ECM Mobile Application and Approval Hub Application on iOS Devices, ensuring seamless workflow management and approvals.

Introduction to ECM & Approval Hub

1- ECM Mobile Application

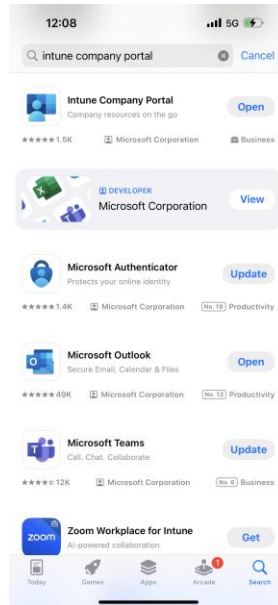

- Lightweight app for on-the-go work item management:
- View and action work items efficiently
- Forward and reply to items
- Digitally sign or initiate workflows

2- Approval Hub Application

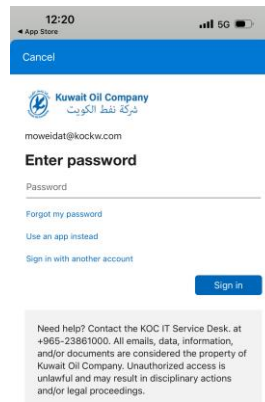

- Centralized interface for quick approvals:
- Consolidates pending approvals from systems like ECM, UPS, End of Service, eBEAMS, and Payments
- Streamlines the approval process from Easy Memo

Installing Intune Company Portal (iOS)

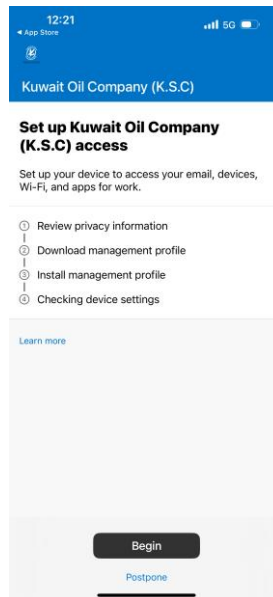

1-Install the Intune Company Portal application from the Apple App Store.

2-Launch Intune Company Portal, enter your KOC email and password, ensuring the Authenticator app is already installed and activated.

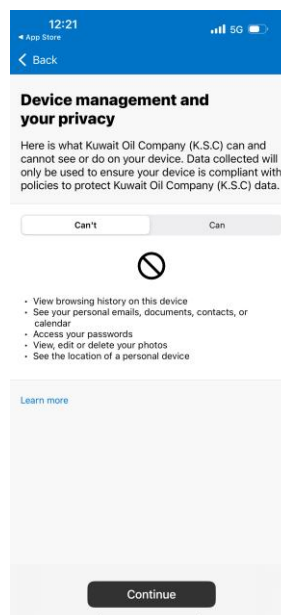

3- Tap "Begin" to automatically create your Work Profile.

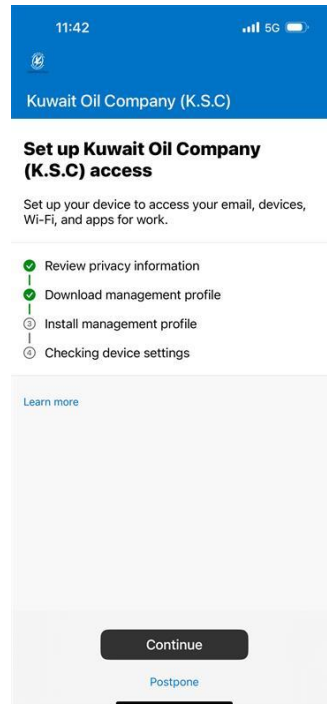

4- Accept Terms & Conditions

Review the Device Management terms and conditions carefully. Click "Continue" to accept and proceed with the installation of the work profile.

5- Configure Device Management

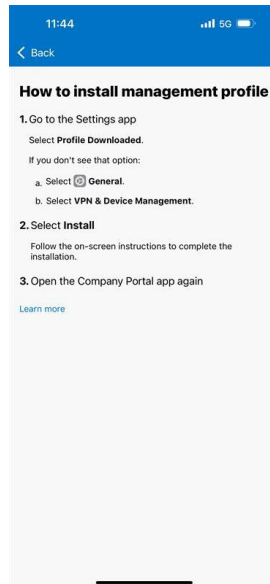

Allow the system to automatically set up the necessary Device Management configurations. This step integrates your device with KOC's security policies. Click "Continue" when prompted.

Configure Management Profile & VPN (iOS)

To use the VPN connection for secure data access as per KOC confidentiality terms and conditions, you must install a VPN certificate to enable KOC portal and mobile applications.

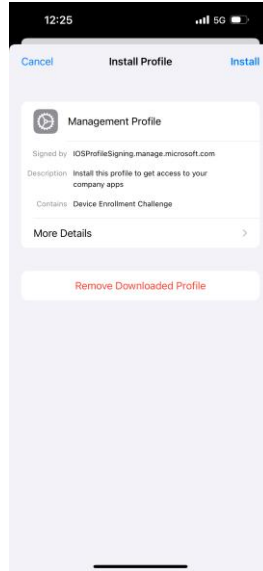

- 1- During company portal configuration, minimize the popped-up screen and navigate to your mobile's main settings.

- 2- Within mobile settings, go to "General," then tap on "VPN," and finally select "Management Profile."

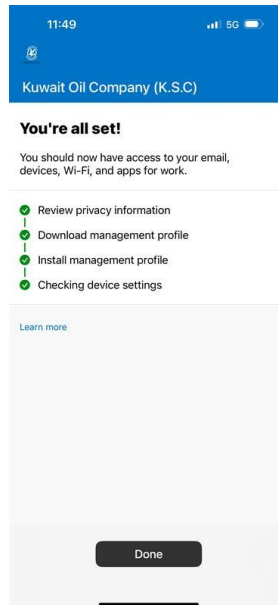

3-Tap "Install" to finalize the installation of the necessary VPN certificate, ensuring secure corporate access.

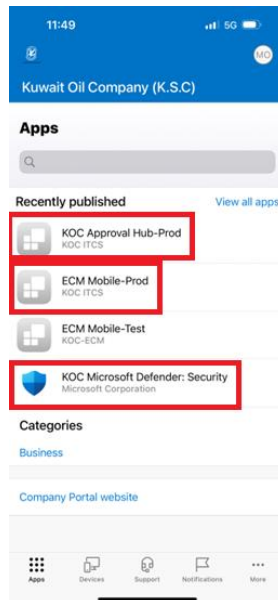

Install KOC Microsoft Defender: security, KOC Approval Hub and ECM Mobile

1-Open Intune Company Portal Store (iOS)

After all device settings are configured, click “Done” within the Company Portal app to seamlessly navigate into the Intune portal store.

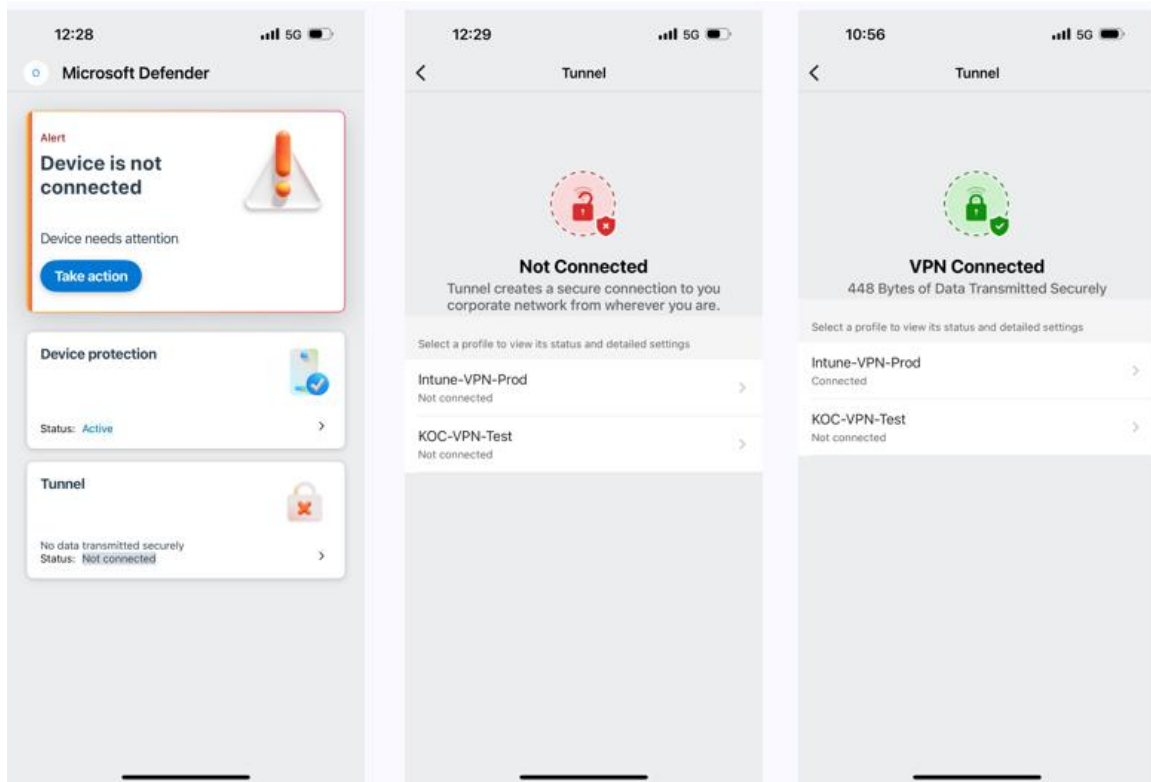

2-From the Intune portal store, download Microsoft Defender and the required ECM Mobile Application and Approval Hub Application to complete your setup.

Activate VPN using MS Defender

To securely use the applications, you must enable MS Defender on your mobile device to ensure encrypted and secure access to corporate resources.

1. Open MS Defender application, then tap on Tunnel.
2. Confirm VPN connection: The VPN connection will automatically establish, and your secure VPN tunnel is "Connected".

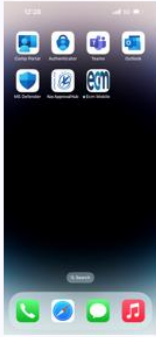

Run ECM Mobile Application

▶

Launch ECM

From the Work Profile, tap the ECM mobile application icon to launch.

🔑

Authenticate

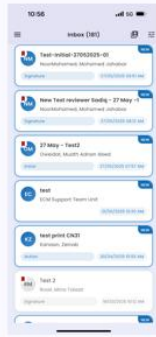

Enter the required authentication passcode number when prompted for secure access.

✓

Ready to Use
